I. I enclose you a copy of
an inscription on a stone
found about 1/2 miles from
Kensington by a O. Ohman
he found it under a tree
when grubbing - he wanted
I should go out and look at
it and I told him to haul
it in when he came (not thinking
much of it) he did so, and this
is an exact copy of it
the first part is of the flat
side of stone the other was on
flat edge. I thought I would
send it to you as you perhaps
never means to find out

What it is - it appears to
be old Greek letters
please let me hear
from you and oblige
yours truly
