

Alaska Steamship Co.

March 13, 1912

C. A. Gray to Hill

"For about two years he [J.H.Young] has been President of the Alaska Steamship Co., and has built the Copper River Railroad in Alaska. He is very prepossessing, an excellent mixer, democratic, an unusually good operating man, and what particularly attracts me just now is that he has an entire grasp of the San Francisco Steamship situation, as he has been operating a fleet between Alaska .. and San Fran!
