

Buffalo herds

August 19, 1885

Hill to Frank Thomson, Philadelphia

There are but few buffalo left anywhere. The only band I know of is about 60 miles south of the Canadian Pacific. Can get elk and antelope on that line. You can do both C.P. and our road on the same trip, say two or three weeks and can find all the ducks and geese you can shoot as well as grouse. I am going up there in September, and would be glad to have you along.
