

Canadian Pacific Road August 3, 1901
Hill to T. G. Shaughnessy, Pres. carbon
Re our line up Kettle River. "We have given time
and money trying to get a line from our Spokane
Falls & Northern to the mines at Republic and
elsewhere South of the Boundary, but the mountain
ranges make the physical conditions such that
the only line with a low grade is by following
the River. This carries us across the Boundary
for a distance of fifteen miles where we follow
the River back into the United States. " Re
your unneighborly freight rates for our line
St. Paul to Winnipeg: "We were the original con-
nection of your Company from the south at both
Emerson and Gretna, until you forced us out of
all that business." General Correspondence
