

Coal-Montana

May 16, 1898

F. E. Ward to J. J. Hill.

By January, 1899 the Anaconda's consumption of coal will be 125,000 tons a month. The Anaconda Company has bought a coal field on the line of the Northern Pacific Road in Carbon County, and are sinking a shaft and will be down to the coal in 3 or 4 months. From explorations made in the fall & winter the N.P. is confident that the mine is all right. Donahoe states it will last ten years. There has been friction between Donahoe and the Great Northern.  ic Department.
