

Crow's Nest Pass Coal Co.      May 7, 1966

Hill to E. T. Nichols

Commends N's purchase of so much Crows Nest stock. "That property is, in my judgment, one of the most valuable on the continent, and its market value will increase rapidly as the Northwest is settled. With Canadian Reciprocity or the free admission of coal to this country, the Crows Nest property should have a net income from one and a half to two millions a year."
