

Great Falls - Smelters

April 17, 1889

Hill to Jno. M. Forbes, Boston

Re Boston & Montana Co. matters. My general conclusion is that their reduction works will go to Great Falls, but it is not certain."The Boston & Montana Mining property at Butte is I think beyond doubt a great property - better in every way than the Anaconda, and as they propose to smelt 1500. tons ore daily we are quite anxious to secure their works at Great Falls, both for the Montana Central" and the Manitoba Road.
