

Great Northern Road - Stock March 10, 1898

John S. Kennedy to Hill

Public has gotten hold of "your intentions both as regards the increase of the Great Northern stock and the St. P. M. & M. and in the New York Times of 27th February ... the programme is published in plain terms. So you had better issue your circular, offering them the additional stock you propose to issue and another calling in the 4% collateral Trust Bonds." Has no fear of a war with Spain despite destruction of the Maine and the jingoists in and out of Congress.
