Hill to Hanna

Re 1900 presidential campaign. Take Minnesota: "the people here are so much against the machine, and the party has named such a weak lot of candidates, that every year nothing short of money in large sums has saved the state. Last year the money was not forthcoming and the result was the election of Jno. Lind, a renegade Swedish Republican Congressman. Lind is a cunning politician and bearing in mind his 23,000 majority last fall, he will not be beaten by a weak candidate on the Republican ticket."
