

Hill, J.J.-Address

February 4, 1914

Carbon. [Toomey] to Prof. C.J.N.Nelson.

"We have no copy of the talk Mr. Hill made at the recent Yale Alumni Dinner in St. Paul...you might send for one of the St. Paul papers of the morning following the dinner. In his talk Mr. Hill urged that more care be given to the elementary work and particularly to greater accuracy in all the preparatory work."
