

Carbon. J.J.Hill to Cyrus Happy.

"For several years I have taken great interest in the matter of irrigating our public domain."

"In connection with a few others I have for the past five years carried on a systematic campaign of education on the subject for the purpose of preserving the public domain, in order that it may become, under a thorough system of irrigation, the most valuable land in the Nation. As a result

of this campaign has seen the recent action of Congress, and I hope from now on the public will show sufficient interest in the subject so that it will not be allowed to slumber."
