

Lake Superior - Commerce September 3, 1895

Hill to H. W. Cannon, Pres. Chase Nat'l Bank, N.Y.
Re heaviest crop of grain of all kinds ever
harvested in this part of the country. "The heavy
movement of iron ore on Lake Superior has
absorbed all the spare vessel room and I think
great difficulty will be found in moving the
grain down the Lakes from Superior to the sea
board. This will undoubtedly affect to some extent
the foreign exchange and movement of gold!
