

MacKenzie, Donald

March 3, 1898

Carbon. [J.J.Hill] to M.A.Hanna.

"You will remember Mr. Donald MacKenzie, the old Superintendent of the Government lock at Sault Ste. Marie. I think that every steamboat man on the Lake regards him as a first class man in every respect. He has been there long, has done the work well, and I hope that nothing will be done to change him."

..."I personally interested myself to keep him there through the Cleveland Administration, simply on account of the expressed

wish of so many of the lake captains in his  
behalf..."
