

Montana - Mineral resources September 4, 1889

Hill to Jay C. Morse, Illinois Steel, Chicago

"We have made no special exploration in the Belt region, but the lead and silver mines opened in that region carry large quantities of manganiiferous iron. The branch line we expect to build will carry the output of these mines and will run near a large deposit of specular ore."

JJH LetterBook, 2/15/89 - 10/23/89, p. 521
