

Montana - Mines & mining August 6, 1889
Hill to C. A. Broadwater
Re Beckler's report on Belt Mountain. Ives and
Warren will accompany me, the former to take
charge of the Montana Central, both traffic and
operation. Saw Parsons in N.Y. and made some
progress, we hope. Had two very interesting
sessions with Mr. Farrell and am satisfied that
copper business in future will have to be made
on an entirely different basis than in past,
in fact, "all the mining and smelting business
must be conducted with more economy and intel-
ligence to give returns on the investment. All
this will help Great Falls."
