

North Oaks Farm

March 6, 1907

Carbon. "JJT" to Thomas Evans.

"The garden at North Oaks Farm takes in seven acres, a large portion of which is given over to the raising of grapes, berries, etc. and vegetables are also raised in large quantities and varieties, all for private use, and flowers are grown only on the grounds outside except chrysanthemums, some being raised in the green house, and there is also a greenhouse given over to the cultivation of grapes."
