

Pacific Extension - Exploration June 18, 1890

Hill to E. H. Beckler, Chief Engineer

Discusses possible routes for the Pacific Extension "westward from Milk River." [Obviously that route through a pass and on to the Coast was still undecided at this time] Several routes are mentioned as possibilities - shore line, Stilaguamish, &c. Reports of our employees "townsiting" where our route is to run and stations are to be made. Discharge all such persons at once.

JJH LetterBook, 6/11/90 - 10/21/90, p. 13
