

Pacific Northwest - Mineral resources 6/21/98

To Gaspard Farrer, London

Will treat Forster generously. Recent discoveries of minerals in Rocky Mts. about 18 miles south of the boundary; whole Goat River - Yakt River country seems mineralized with iron and copper-bearing gold. Kaslo & Slocan road fell off greatly in earnings because of heaviest snow in many years in mts. "If he [Forster] cannot arrange to do more than build the line from the Lake [Kootenai] down to the Boundary, we would be ready to meet him at the Boundary."

JJH Letter Book, 10/1 95 - 3/13/99. p.348
