

Railroads - Agreements

June 12, 1901

Hill to Robert Bacon carbon

Re Great Northern's representative [to joint interests' plan - 4 railroads] Miller. "I only write ... to provide against [the points raised ... in order that they may not be overlooked should any question arise in discussing the matter with Harriman. To estimate Miller's ability to fill the place, you will only have to recall how well he handled the question with [J.C.?] Stubbs [the other representative] and, through him, with Harriman." "I have a letter today from Schiff repeating his 'great gratification' that means have been found to bring together the respective interests."
