

Steinthal, Max

October 14, 1898

Mas Steinthal to James J. Hill.

Has received the report from Haber, who believes that the real development at Troublesome Creek can be started in the spring and that smelting works can then be erected. Hopes Hill will remain in the Syndicate [Allgemeines Explorations unternehmen]. Is happy to receive word from Hill that he is "prepared to facilitate the transportation of the Troublesome ores by building a branch line up to the mining district."
