1880, May 4

Stephen to S. S. Merrill

Long and important letter. Disappointed that in our interview yesterday your Directors voiced objections to our building the Brown's Valley Line from Morris westward to Lake Traverse, Explians that it was begun under pressure of cirsumstances to prevent the construction of the Little Falls and Dakota line and because then we "came under obligation to the Settlers who nave (mainly under the auspices of Bishop Ireland entered upon lands of the Company to ufrnish them with Railway facilities." Refers to an in-terview Hill had with yo March, 1879, that

led to a proposition that our Company should buy the Hastings and Da' a line which we would have been glad to do, but we declined to entertain from a desire not to interfere with the negotiations you had already instituted." This led us, when you did buy that railway to a belie you approved our building the Brown's Valley Line.

Signed: G. Stephen, Pres.
