

Tuck, Edward

August 18, 1899

Hill to Tuck carbon and letterbook

"We are carrying out the idea of a Company to hold a number of our outside securities which heretofore have paid their revenue to the shareholders of the Great Northern by way of dividend to that Company. Later we want to get these revenues into such shape that they may be paid directly to the shareholders of record and not pass through the books of the Great Northern." Re an apartment of JJH in Paris "for such of my tribe as may visit the Exposition next year."
