

United States Steel Corporation

Aug. 2, 1902

Paris Gibson to Hill

U.S. Steel man is examining the manganese mines for the second time. He seems not much impressed with the iron of the Belt Mountains, altho [Archie] Chisholm of Bozeman seemed anxious to get him to look for iron in some other parts of the state. Data re Chisholm and iron: "I understand they have obtained written options on a large number of iron properties." See also his letter of Sept. 8, 1902, Hill's carbon of Sept-7, 1902, and other letters of Sept. 13, 1902 & January 29, 1903.
