

Vouchers - Second series #1-3251, 1896-1916  
These cover Hill's business life and run parallel to the main file of his vouchers. Why the two similar files were kept is not clear, though it is at least possible that E.T. Nichols in New York kept the second file, since nearly all transactions were made there. A large percentage of those transactions related to Hill's securities and investments, which Nichols supervised.
