SCOPE AND CONTENTS OF THE RECORDS

Records gathered from the counties by the Conservation Department to prepare a watershed map of each county, showing the location, kind and number of all drainage systems. The majority of these files were compiled in the 1950s but a few documents date from the 1960s. Also included in the records are an index of all judicial, county, state, cooperative, and supplemental ditches and an inventory list of dams. Included in the files are maps (drainage, county, watershed), graphs, drainage area summations or calculations, lists of judicial, county, and state ditches, memoranda, and correspondence.

The files form part of the records of the Minnesota Department of Conservation.

ARRANGEMENT OF THE RECORDS

The files are arranged in alphabetical order by subject or county.
