

Let's Play the Energy Conservation Game!

First, cut out the game board and tape it together.

Then, make a game piece or find a small object to use like an eraser or pen cap.

Next, cut out the circle below.

Lastly, use the point of a pencil to anchor a paperclip to the center circle.

You now have a spinner to play the game.

Flick the paperclip, read the pie to make your move.

This game was modified from the website listed below. It takes less time to play and draws attention to relevant changes we can make in our daily lives to save energy.
